ABOUT ME

I specialize in technically demanding environments, spanning development, web development, systems, and IT security, while leveraging AI tools for faster and more accurate analysis. Adaptable and observant, I excel at identifying subtle issues, working in teams, and maintaining dedication and ambition in assigned projects. I have a particular interest in risk analysis methods and securing systems.

EDUCATION

- ❖ **Bachelor 1&2 (Common Core):**
Keyce Informatique Et Intelligence artificiel
- ❖ **GCE A-Level(General Certificate of Education Advanced-Level):**
GSB Orchidée (Complexe Scolaire Bilingue L'Orchidée)
- ❖ **GCE O-Level(General Certificate of Education Ordinary-Level):**
British Isles International College

LANGUES

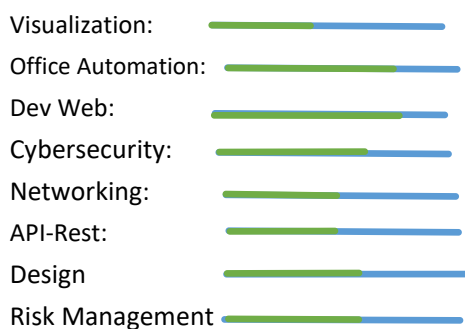

ENGLISH

FRENCH

COMPETENCES

PROJECTS & CONCEPTS

- ❖ **Stock Management Application in C# (2024–2025)**
Developed a stock management application (products, inputs/outputs, quantity tracking) with a graphical interface in C#, integrating CRUD operations and simple validation logic to minimize input errors.
- ❖ **Recreation and Enhancement of MS Word (2025–2026) – Keyce IT & AI**
A C# project recreating a Word-like text processor, adding advanced features (ergonomic improvements, task automation, intelligent logic) while retaining classic editing and formatting functions.
- ❖ **Multi-System Unlock Key Design (2025–2026) – Kali Environment**
Created a bootable drive enabling unlocking and recovery operations across multiple Windows versions, using Kali tools for analysis, preparation, and management of target systems.
- ❖ **Risk Analysis: EBIOS RM-Bow-Tie (2025–2026) – Kali Environment, Keyce IT & AI**
Applied risk analysis study for the school's information system, combining the EBIOS Risk Manager method and Bow-Tie modeling to identify critical assets, threat scenarios, and priority security measures.
- ❖ **Logistics Manager – Promote 2026 Salon – Karochebama (2026)**
Participated in the 2026 edition of the Promote Salon in Yaoundé as the logistics manager for Karochebama: coordinated the booth, managed equipment, and addressed team needs in a high-traffic event setting.

TOOLS & SOFTWARE

- Virtualization & Systems:** VMware, Kali Linux, Ubuntu, Metasploit, Windows 8/10/11
- Development:** VS Code, PyCharm Community, Unity
- Office Automation:** Microsoft Office, WPS Office, VBA Macros
- Web & Databases:** WAMP, XAMPP, PostgreSQL, FileZilla
- Networking:** Cisco Packet Tracer
- Cybersecurity & Audit Tools:** Nmap, Hydra, Nikto, Ettercap, Metasploit, MSFVenom, Hashcat, Apache, Flask
- API Testing Tools:** Postman, Insomnia
- Languages & Technologies:** Java, PHP, JavaScript, HTML, CSS, React, Spring Boot, REST API, Maven
- Risk Management:** ISO 2700, EBIOS RM, Bow-Tie.
